Customized analyzers

CAN WE HELP YOU?

MIRIS MAKES MID-IR INFRARED ANALYZERS FOR FLUIDS

Miris' technology can be applied in many different industries including dairy, meat, fish, breast milk and the pharmaceutical industry.

If the substance absorbs energy in the mid-infrared spectra, Miris instruments can detect concentrations above 0.01%.

Do not hesitate to contact us with your unique analysis problems. Our experienced and innovative technologists can advise if MIR analysis will meet your requirements.
